애니메이션 일기 UML 및 설계 자료

1. 설계 전 마인드맵

- 요소 위주로 표현함
 - 도형
 - GUI
 - 템플릿 및 작업 공간
- 전체적인 완성 모습을 생각하며 마인드맵을 제작함
- 사람의 추억을 하나의 프레임으 로 표현하기는 어렵다고 생각함
 - 편의성
 - 접근성

1. 설계 전 마인드맵

2. 기능 생각 및 정리, 제약 조건

필수 기능 1. 그림과 글이 동시에 나와야 한다.

필수 기능 2. 저장 및 불러 오기가 가능해야 한다.

2. 기능 생각 및 정리, 제약 조건

생각한 기능 1. PPT 처럼 미리 템플릿을 만들어서 작성 가능하게 한다.

생각한 기능 2. 그림판과는 다르게 각각의 요소를 선택 가능하도록 만든다.

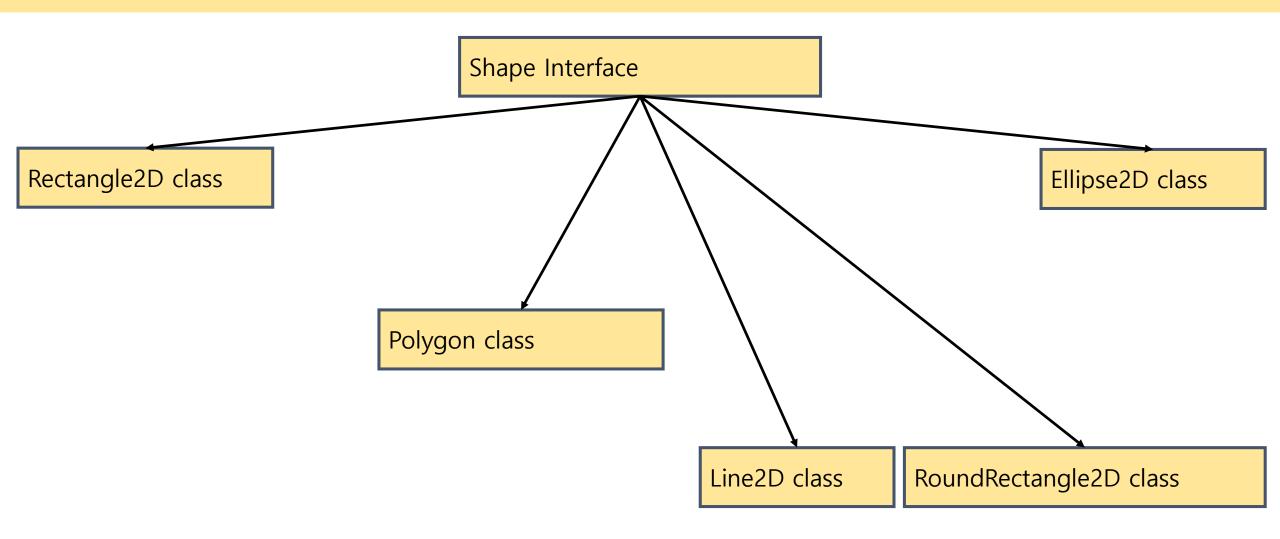

- 생각한 기능 3. 슬라이드를 이용해서 여러 장의 그림을 보여 줄 수 있도록 한다.
- 생각한 기능 4. 드래그 앤 드랍 방식의 이미지 추가 및 불러오기를 가능하게 한다.

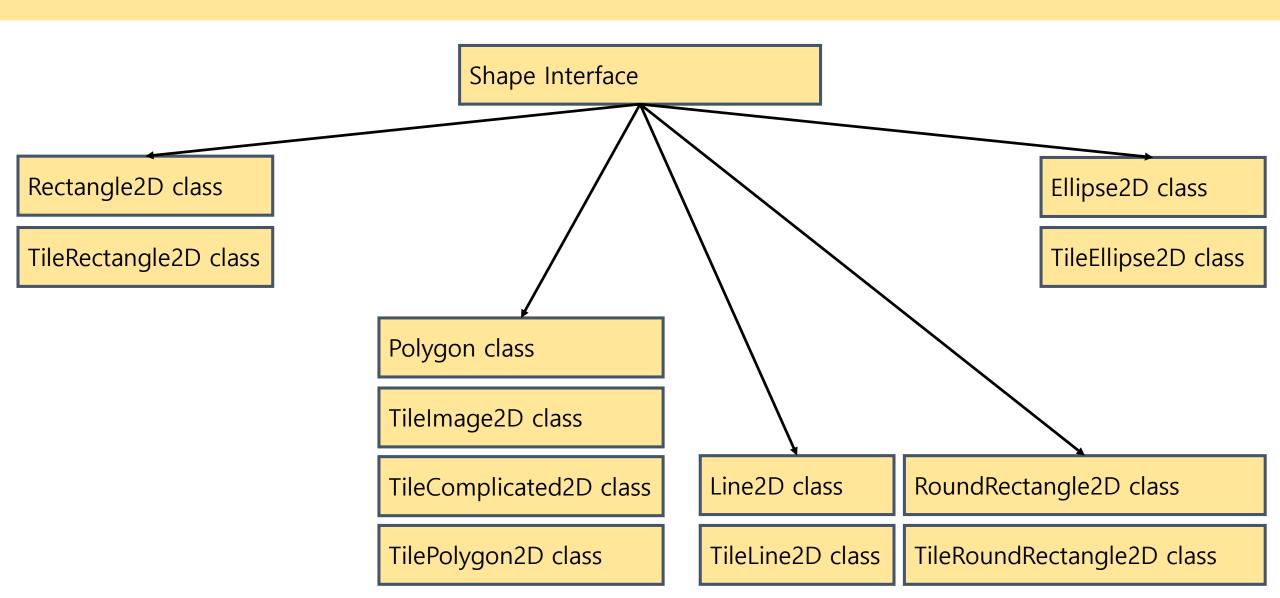

2. 기능 생각 및 정리, 제약 조건

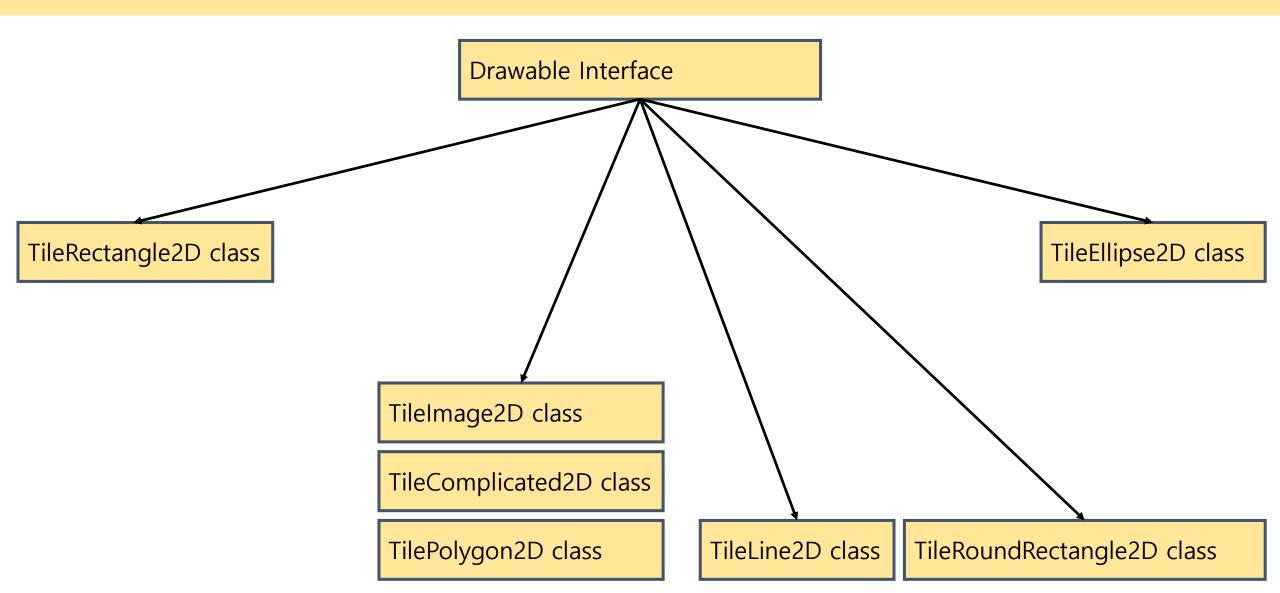

생각한 기능 5. 그림을 연속해서 시간 차를 두고 보여주게 된다면 애니메이션처럼 보일 것 이다.

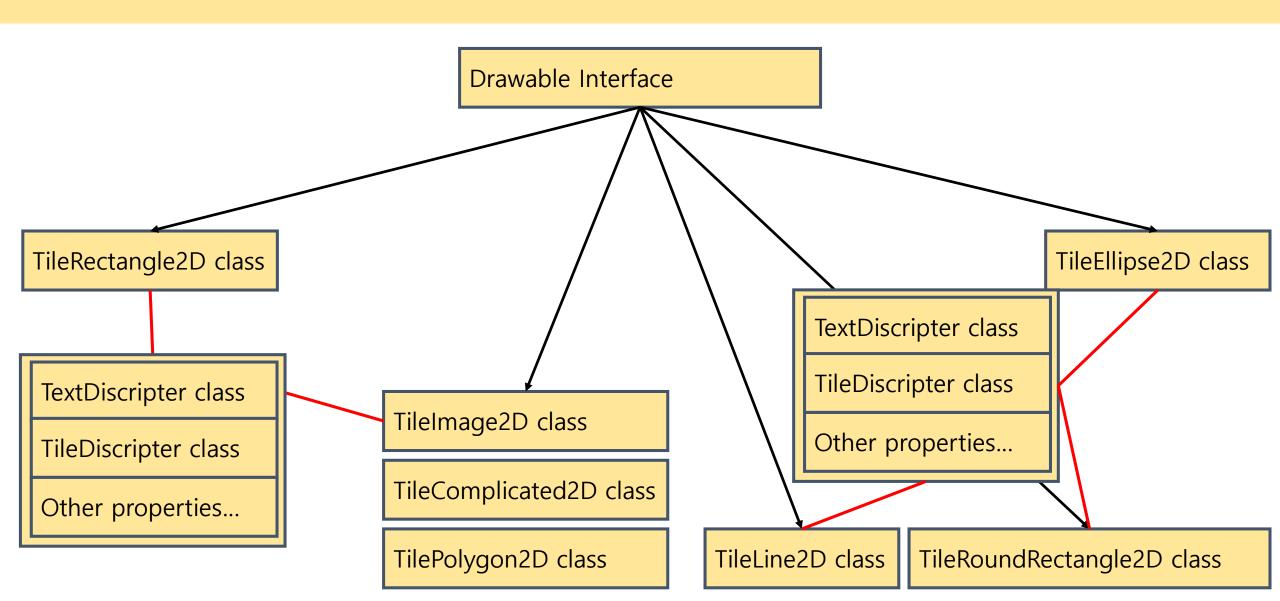

생각한 기능 6. 애니메이션에 대한 정보는 따로 클래스를 만들어서 실행하게 한다.

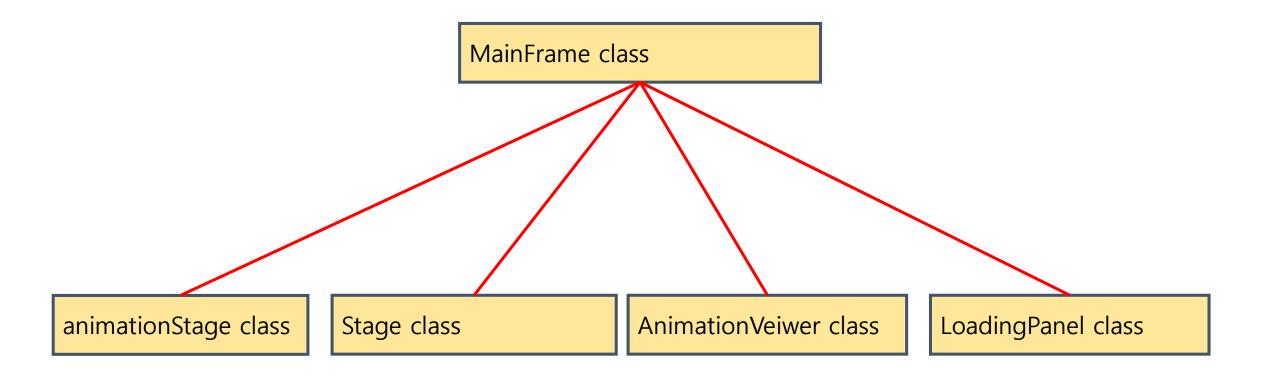

- 생각한 기능 7. 애니메이션을 쉽게 만들기 위해 UI를 최소화 하도록 한다.
- 생각한 기능 8. 빠른 프로그램 실행을 위해서 실행 모드와 제작 모드를 나눈다.

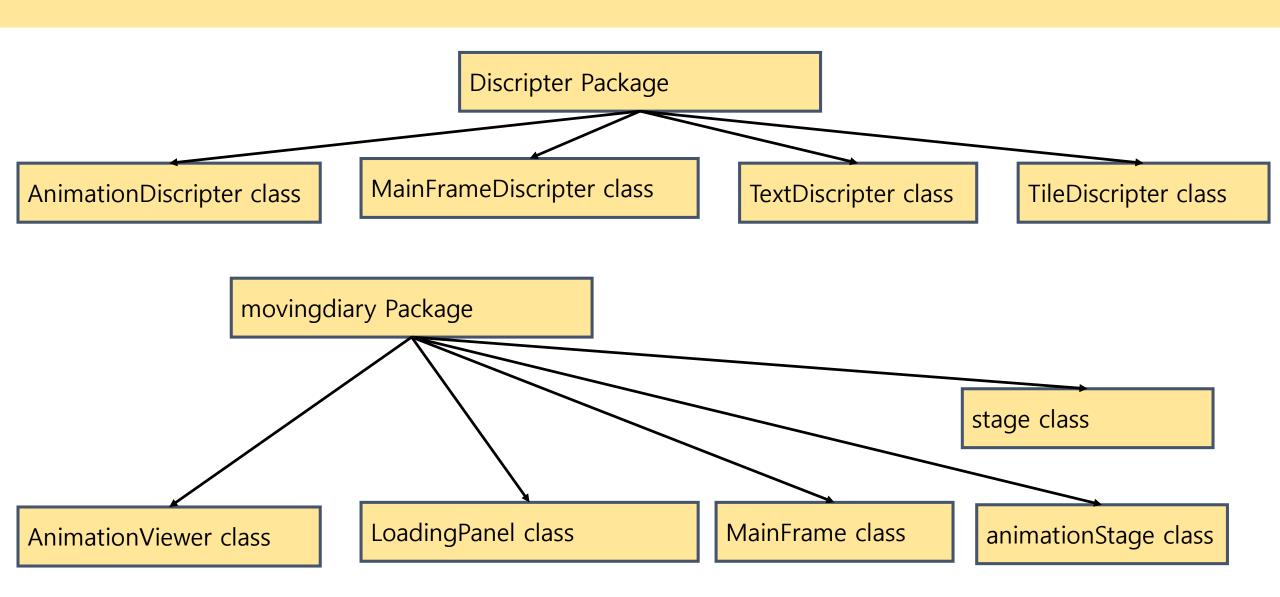

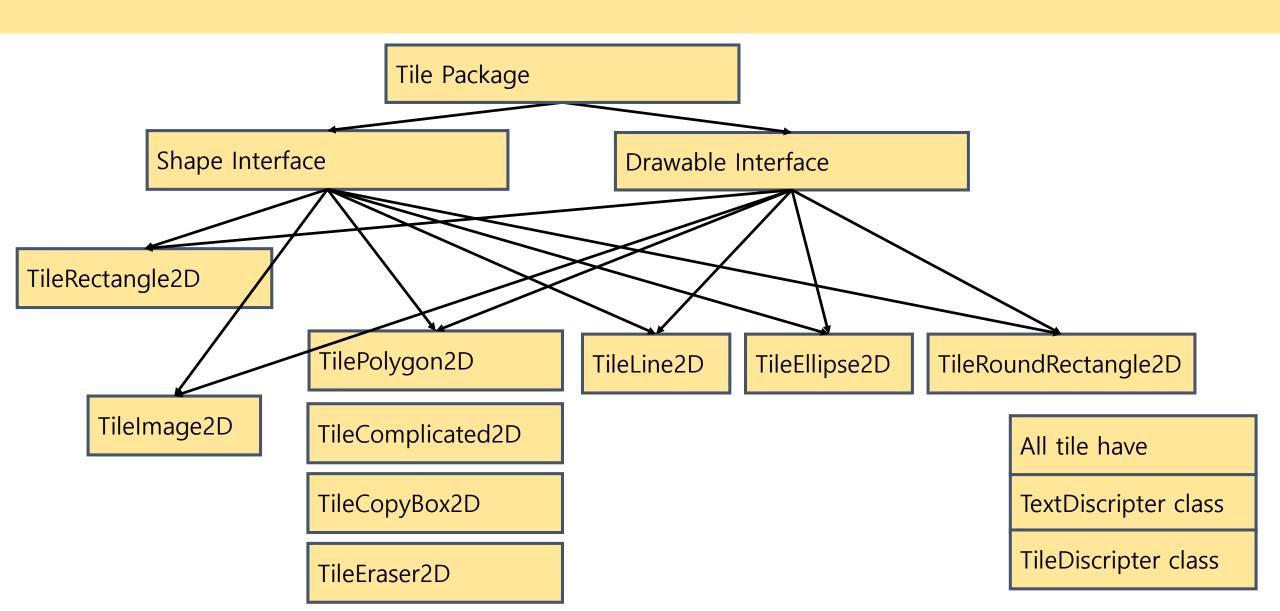

4. 데모

7. 해결 한 어려웠던 점

- 이미 만들어져 있는 Polygon2D, Rectangle2D 등을 상속 받으면서도 그림을 그릴 수 있게 해주는 클래스를 상속 받고 싶은 설계 문제 해결.
 - Heap 공간 부족 문제 해결.
 - 애니메이션 출력 시 화면 깜빡임 문제 해결.
- BufferedImage 의 Serializable 문제 해결
 - Implements clonable 에서 clone() 함수의 return 값 문제 해결.
 - 클릭 한 곳에 어떤 타일이 있는가 문제 해결

7. 해결 한 어려웠던 점

- 회전 시 자신의 중심 기준으로 한 것이 아니라 왼쪽 위의 원점을 기준으로 회전하는 점 해결.
 - ArrayList.size() 까지 for 문을 돌리면서 I 번째 것을 지우는 것에서 오류 해결.
- ArrayList 값 복사와 레퍼런스 복사 문제 해결.
 - Paint 가 재정의 되어야하는 panel 들 재정의로 문제 해결.
- 저장 후 불러오기에서 이미지가 위치가 변하면 이미지가 깨지는 문제 해결.

7. 해결한 어려웠던 점

ArrayList.size() 까지 for 문을 돌리면서 I 번째 것을 지우는 것에서 오류 해결.

```
ArrayList al 이 있다고 할 때
For( int i = some_number; i < al.size(); i++) {
    al.remove( i );
}
에서 문제는..?
```

8. 해결 못 한 어려웠던 점

- 이미지 저장 시 BufferedImage 가 직렬화 되지 않아서 예외 발생
- 네트워크 서버 IP 가 0.0.0.0 : 8000 으로 뜨던 문제
- 다른 프로젝트와 결합하려 했었으나 시간이 부족 http://codegiraffe.iptime.org₩Savefile
 - 기능이 구현되지 않은 버튼들이 존재
- MainFrame Class 에서 View 와 Control의 혼재가 있었음. Data 접근성 때문에 어려웠음.
